

Produkt oversigt
Grp. 0010 – Messing uden lak

Poleret messing, uden lak.

Ubehandlet messing får med tiden en flot patina, som er en naturlig proces der dannes i fri luft.

Patineringen opstår ved at metallet oxiderer og i denne proces skaber et lag af brun-, sort-, røde og grønne nuancer ovenpå det eksisterende metal.

Selve pateringsprocessen er metallets egen forsvarsevne, hvor et nyt lag skal beskytte det underliggende lag.

Vil man bevare den polerede overflade, skal messingene pudses regelmæssigt med et polermiddel.

Kvalitet og godt håndværk

Dørgreb og tilbehør slibes eller poleres i hånden af professionelle håndværkere.

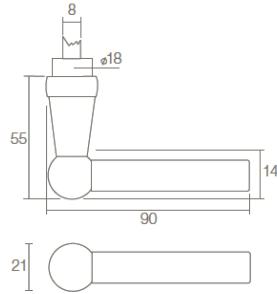

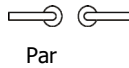

Slibning og polering af metaller er et håndværk, som ikke bare kræver en uddannelse, men også en sikker hånd og kunstnerisk sans, når man bearbejder designprodukter.

Et håndværk som kun få mestre.

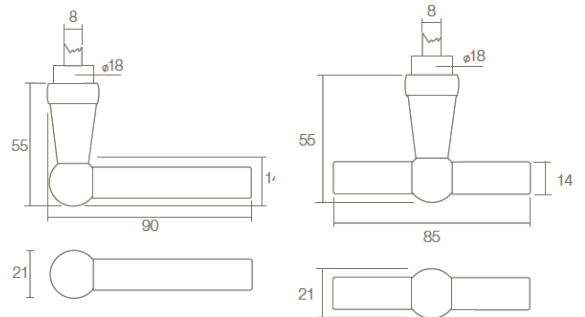

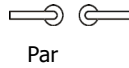

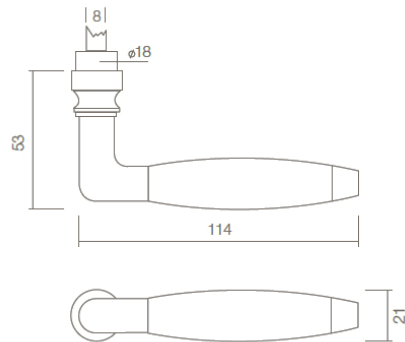

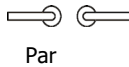

Dørgreb L+L
Vare nr.: **0010.032300**

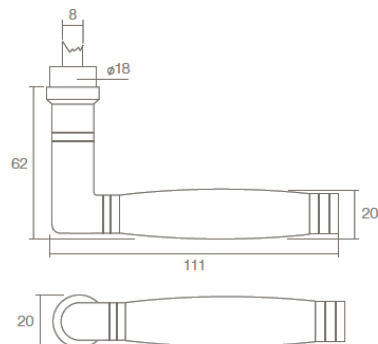

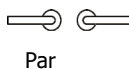

Dørgreb L+T
Vare nr.: **0010.032400**

Dørgreb med træ hæfte
Vare nr.: **0010.037100**

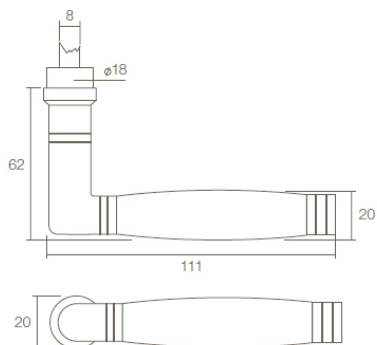

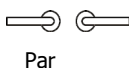

Dørgreb med træ hæfte
Vare nr.: **0010.037500**

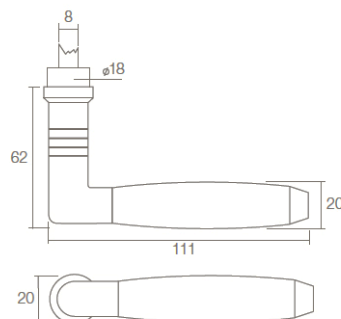

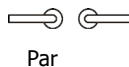

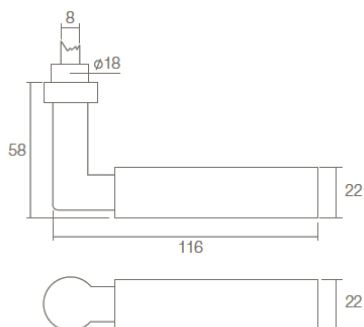

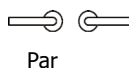

Dørgreb med ibenholt hæfte.
Vare nr.: **0010.037500**
